How to update Netlake2 MB Fru

2025/11/07 by WW Jay-Zhang

- First check Netlake2 MB EEPROM is clear or not.

1. Use **weutil – l** checks the eerpom location.

```
root@bmc-oob:~# weutil -l
netlake-eeprom    /sys/devices/platform/ahb/ahb:apb/ahb:apb:bus@1e78a000/1e78a280.i2c-bus/i2c-4/4-0056/eeprom
```

2.Use hexdump -C <eeprom location> check eeprom value.

a. if all value is “ff” can doing writing the new Fru data.

```
root@bmc-oob:/home# hexdump -C /sys/devices/platform/ahb/ahb:apb/ahb:apb:bus@1e78a000/1e78a280.i2c-bus/i2c-4/4-0056/eeprom
00000000  ff ff ff ff ff ff ff ff  ff ff ff ff ff ff ff ff  |................|
*
00004000
```

b. if EEPROM data has value need to clear data before writing new Fru data.

```
root@bmc-oob:/home# hexdump -C /sys/devices/platform/ahb/ahb:apb/ahb:apb:bus@1e78a000/1e78a280.i2c-bus/i2c-4/4-0056/eeprom
00000000  fb fb 06 ff 01 07 4e 45  54 4c 41 4b 45 02 02 4e  |......NETLAKE..N|
00000010  41 03 08 4e 41 20 20 20  20 20 20 04 0c 4e 41 20  |A..NA      ..NA |
00000020  20 20 20 20 20 20 20 20  20 05 0c 4e 41 20 20 20  |         ..NA   |
00000030  20 20 20 20 20 20 20 06  02 4e 41 07 02 4e 41 08  |       ..NA..NA.|
00000040  01 04 09 01 00 0a 01 00  0b 02 4e 41 0c 06 57 49  |..........NA..WI|
00000050  57 59 4e 4e 0d 08 4e 41  20 20 20 20 20 20 0e 02  |WYNN..NA      ..|
00000060  4e 41 0f 04 57 59 54 4e  10 03 55 32 30 11 08 00  |NA..WYTN..U20...|
00000070  00 00 00 00 00 00 00 12  08 00 00 00 00 00 00 00  |................|
00000080  00 13 08 00 00 00 00 00  00 00 00 14 08 00 00 00  |................|
00000090  00 00 00 00 00 15 01 00  fa 02 bc fa ff ff ff ff  |................|
000000a0  ff ff ff ff ff ff ff ff  ff ff ff ff ff ff ff ff  |................|
*
00004000
```

c. use weutil -w clear_all_eeprom_data.bin clear all EEPROM data and

check the EEPROM data again make sure EEPROM data is all clear.

```
root@bmc-oob:/home# weutil -w clear_all_eeprom_data.bin
Write clear_all_eeprom_data.bin to netlake-eeprom success !
root@bmc-oob:/home#
root@bmc-oob:/home# hexdump -C /sys/devices/platform/ahb/ahb:apb/ahb:apb:bus@1e78a000/1e78a280.i2c-bus/i2c-4/4-0056/eeprom
00000000  ff ff ff ff ff ff ff ff  ff ff ff ff ff ff ff ff  |................|
*
00004000
```

- Write the Golden Image to Netlake2 MB EEPROM

a. use weutil -w Netlake2-Golden-FBOSS-v6_xxxxxxxx.bin

```
root@bmc-oob:/home# weutil -w Netlake2-Golden-FBOSS-v6_20251107.bin
Write Netlake2-Golden-FBOSS-v6_20251107.bin to netlake-eeprom success !
```

*each Golden Image have checksum value need to check.

```
root@bmc-oob:/home#
root@bmc-oob:/home# md5sum Netlake2-Golden-FBOSS-v6_20251107.bin
2d7e29c9fae0bc31d063887c0cc3343d  Netlake2-Golden-FBOSS-v6_20251107.bin
root@bmc-oob:/home#
root@bmc-oob:/home# sha1sum Netlake2-Golden-FBOSS-v6_20251107.bin
8397c802643f8ddc712ea483e8c3d243ffa62ea3  Netlake2-Golden-FBOSS-v6_20251107.bin
root@bmc-oob:/home#
root@bmc-oob:/home# sha256sum Netlake2-Golden-FBOSS-v6_20251107.bin
63374b2b36a65205630f0f93c188a6fbfba057d260fc292e081d3eedd059315c  Netlake2-Golden-FBOSS-v6_20251107.bin
```

b. use weutil check can show the correct EEPROM and correct CRC value

CRC need to show "CRC Matched"

```
root@bmc-oob:/home# weutil
Version: 6
Product Name: NETLAKE20
Product Part Number: NA
System Assembly Part Number: NA
Meta PCBA Part Number: NA
Meta PCB Part Number: NA
